## **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: it is deemed novel and unobvious over the prior at of record to so form a pot for an array of hollow fiber membranes as claimed in claim 4, including placing the ends of the fiber membranes in a mold and forming a first layer of a curable resin in a non-cured state around the ends, and monitoring a curing process of the first layer to determine an optimal time for applying a second layer of polyurethane resin material prior to full cure of the first layer, wherein a fully cure polyurethane resin material is of a higher flexibility than a fully cured curable resin material; the method also further claimed in claim 7. wherein the process further includes providing a potting sleeve within the mold to receive a first layer and a second layer wherein the sleeve comprises adhesion means assists in adhesion of at least one resin material to the potting sleeve; and further, as claimed in claim 21, a method of forming a pot for an array of hollow fiber membranes including placing the ends of the fiber membranes in a mold, and forming a first layer of a curable resin material in a non-cured state around the ends, the resin comprising epoxy groups, and applying a second layer of a polyurethane material comprising amine groups or amide groups to the first layer prior to full curing of the first layer, wherein the amine or amide groups chemically react with the epoxy groups to form an adhesive bond, and wherein the fully cure polyurethane is of a higher flexibility than a fully cured curable resin material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
